

Mundus Bag[®] water filter

Gutter Bin[®] stormwater filtration system

The Mundus Bag water filter removes trash, microplastics, sediment, heavy metals, nutrients, oil, and hydrocarbons from stormwater and the environment. The Mundus Bag is a versatile water filter that integrates with the Gutter Bin stormwater filtration system and provides the user with measurable and quantifiable results.

Features & Benefits

- Cylindrical filter design facilitates manual or vacuum truck cleaning methods
- An adjustable backflow preventer inhibits scouring and the loss of captured floatable pollutants
- Patented design allows for a wide variety of configurations and pollution capture options with evacuation from top or bottom of bag
- Stainless steel hoop in the top anchor ensures a secure fit with the Gutter Bin
- Removeable, replaceable and customizable filtration capabilities
- Flexible construction fits most any shape or depth catch basin
- High quality material and construction equate to 700+ pound tested capacity, an extended field life & reusability
- Capable of vertical or sloped applications
- Cylinder-like configuration packs trash and creates a sand filter-like effect
- Made in USA with 100% recyclable material

CERTIFIED:

- ✓ Full Trash Capture (CA)
- ✓ Vector Control Accessible (CA)
- ✓ Temporary Erosion Control (WA)

Mundus Bag Models

TTC
Total Trash Capture
4.0 mm aperture opening
Reusable polypro net

TDS
Trash, Debris & Sediment
0.21mm aperture opening
disposable geofabric

VTF
Vacuum Truck Friendly
0.6 mm aperture opening
reusable polypro mesh

SHHT
**Sediment, Hydrocarbons,
Heavy Metals, & Trash**
MYCELX Performer media

Chemistry by: **MYCELX**

MYCELX Snippets filter media permanently removes oil and grease from stormwater. Snippets are an optional media that work within the Mundus Bag to efficiently remove most hydrocarbons. MYCELX is non-toxic, environmentally safe and approved for use in the Galapagos Islands

The reusable 16" VTF-MB makes a great beach and river cleanup bag

* Multiply value accordingly for Gutter Bins with multiple Mundus Bag receivers.

Note: assumes the Mundus Bag is 4' feet long. Shorter bags can accommodate shallower catch basins.

For use in all Gutter Bin stormwater filtration systems

Useful Conversions

1 CFM = 7.48 GPM = 28.3 L/min
1 gal = 3.79L - 8.34 lbs H₂O
1 m² = 10.76 ft²
1 acre = 43,560 ft²/acre
1 Bar = 14.5 PSI at sea level
1 in = 2.54 cm
1 mile = 1.61 km
gutter sand SG = 2.2
